

Psychology Vocabulary
Chapter 4 Sensation and Perception

absolute threshold
auditory nerve
body position and motion
chemical senses
closure
cochlea
colors of the visible spectrum
Conductive deafness
continuity
Convergence
difference threshold
farsighted
How we perceive objects
kinesthesia
lens
middle ear
olfactory nerve
photoreceptor
proximity
pupil
retina
Rods in the retina
sensation of pain
Sensorineural deafness
Sharpness of vision
Signal-detection theory
sound perception
stroboscopic motion
Through the process of sensory adaptation
vestibular sense
